**COURSES AND
CERTIFICATIONS****PCEP Certified Entry Level Python Programmer**

Entry level python certification.

Data Visualizations with Python (IBM)

Data visualization course with Python using libraries such as Pandas and Matplotlib to visualize data from data frames.

Python for Data Science (IBM)

Course to learn how to use Numpy, data structures, conditional statements and data structures using Python.

IBM Blockchain Essentials V2 (IBM)

Course to learn the fundamentals of the blockchain technology

Cloud Core (IBM)

Learned more about cloud infrastructure, technology and what can be done with it.

Containers and Kubernetes Essentials (IBM)

Really good course about containers, it helped a lot to grasp the concept of containers and images and how to utilize them in a better way.

Watson and Cloud Foundations (IBM)

Course to learn more about IBM Watson computer, how it thinks and how it is utilized in different fields by using the cloud.

Enterprise Design Thinking Practitioner (IBM)

Learned about Design Thinking methodology and how it can be applied in any context.

Security and Privacy by Design Foundations (IBM)

Improved my security skills while developing software and also while using my own computer and social media.

ABOUT ME

I was born in the sunny shores of Mazatlan, a coastal gem on the Mexican Pacific.

Currently living in Guadalajara, Jalisco, Mexico.

When I'm not busy relaxing at the beach, you'll find me kicking a soccer ball, watching horror movies, playing some video games, or sipping on some delicious local craft beer.

Lately, I've been diving deep into the world of AI software development, agents and automations.

And of course, my favorite food will always be the seafood straight from my hometown.
